

Jeppesen Precision Approach System

Critical Distance and Communication Technology

Jeppesen Precision Approach System (PAS) is a communication and networking system which modernizes river navigation and safety on the U.S. inland waterway system.

Jeppesen PAS Provides

- True Critical Distance and Situational Awareness
- Improved Locking Efficiencies
- AIS Integration and Visibility
- Real-Time Lock Conditions-Communications Link

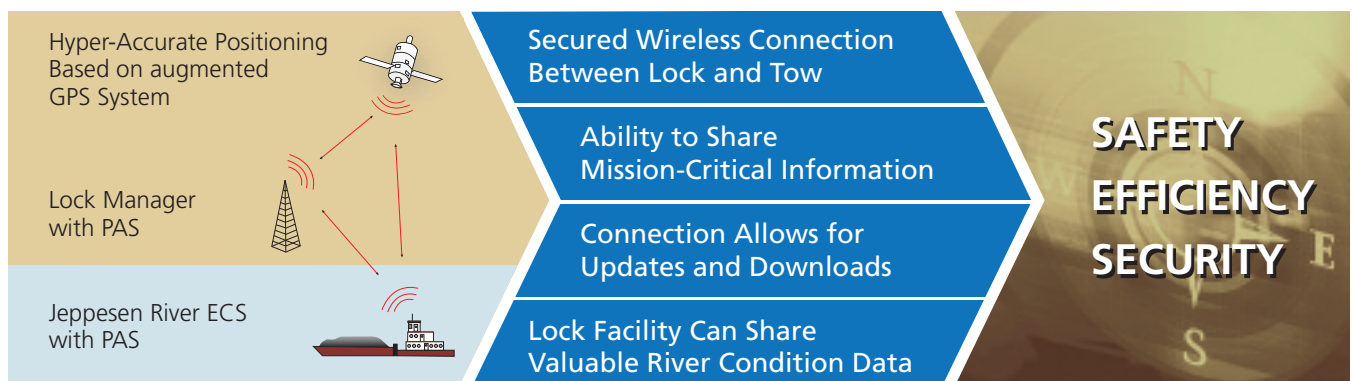

Jeppesen PAS Improves

- Information Reliability and Accuracy
- Reduced Visibility Locking Capabilities
- Real-Time Lock Conditions
- Chamber Selection Efficiencies

Jeppesen PAS Protects

- Lock Assets and Infrastructure
- Safety of Crew and Tow

Jeppesen PAS Hot Zone—The Link

Coming Soon!

Jeppesen Electronic Charting System (ECS)

As a leader in navigation solutions Jeppesen will introduce the latest in electronic chart systems tailored for the inland and coastal commercial tow industry.

Features will include AIS integration, radar overlay and powerful marine solution efficiencies.

Jeppesen – A Legacy of Leadership

For more than 70 years, aviation professionals worldwide have relied on Jeppesen for the information they need to reach their destinations safely and successfully.

Today, pilots can fly safely while surrounded by clouds because there are detailed aeronautical charts, carefully documented procedures, and sophisticated navigational technologies to guide them.

The business that began with handwritten notes in a little black book is now the leader in providing flight information throughout the world. In addition to Airway Manual® services, the company offers navigational information in a wide variety of paper and electronic formats. It also provides a number of other aviation information services, including airport information, flight planning services, computerized weather, and pilot training materials.

From Aviation to Marine

And now, Jeppesen is bringing the same innovative spirit to marine operators around the world. By leveraging our advanced data management infrastructure we are enhancing navigation and delivering robust operations solutions to marine operators in the commercial, government and recreational markets.
