

CHAPTER 1**Piston Engine Operation and Construction**

Introduction	1-1
The Otto Cycle	1-2
Induction	1-2
Compression Stroke	1-2
Power Stroke	1-3
Exhaust Stroke.....	1-3
Ineffective Crank Angle.....	1-4
Pressure Volume Diagram	1-4
Valve Timing	1-5
Inlet Valve (Lead/Lag).....	1-5
Exhaust Valve (Lead/Lag).....	1-6
Valve Overlap	1-6
Ignition Timing.....	1-6
Power.....	1-7
Indicated Horsepower	1-7
Friction Horsepower.....	1-7
Brake Horsepower	1-7
Cylinder Arrangements	1-8
Radial.....	1-9
Horizontally Opposed.....	1-9
Engine Efficiencies.....	1-10
Thermal Efficiency	1-10
Mechanical Efficiency	1-10
Volumetric Efficiency.....	1-10
Specific Fuel Consumption (SFC)	1-10
Compression Ratio	1-10
Engine Major Component Parts.....	1-11
Crankcase.....	1-11
Crankshaft.....	1-13
Connecting Rod	1-14
Piston.....	1-14
Cylinder Barrel	1-15
Cylinder Head	1-15
Valve Operation	1-17

CHAPTER 2**Piston Engine Carburation**

Aviation Fuels	2-1
Avgas	2-1
Octane Rating	2-1
Fuel Contamination.....	2-2
Density of Fuels	2-2
Mixture Ratio.....	2-2
Exhaust Gas Temperature.....	2-4
Flame Rate	2-4
Detonation.....	2-5
Pre-Ignition.....	2-6

CHAPTER 3**Piston Engine Carburetors**

Introduction	3-1
Simple Float Carburettor	3-1
Limitations	3-2
Diffuser.....	3-3
Idle or Slow Running System	3-4
Air Pressure Balance	3-4
Accelerator Pump.....	3-5
Mixture Control.....	3-6
Needle Type Mixture Control	3-6
Air Bleed Mixture Control	3-7
Power Enrichment/Economiser Systems	3-7
Needle Valve Enrichment.....	3-8
Back-Suction Economiser	3-8
Carburettor and Intake Icing.....	3-9
Carburettor Ice Formation	3-9
Throttle Ice	3-10
Impact Icing.....	3-10
Carburettor Hot Air Check.....	3-10
Carburettor Intake Heating	3-11
Effect of Induction System Icing on Engine Performance	3-11

CHAPTER 4**Piston Engine Lubrication and Cooling**

Introduction	4-1
Lubricating Oil Types	4-1
Oil Grades	4-2
Multi-Grade Oils	4-2
Lubrication Systems.....	4-3
Dry Sump System	4-3
Wet Sump System	4-4
System Components.....	4-5
Pressure Pump	4-5
Coolers.....	4-5
Filters	4-6
Pressure Gauge.....	4-7
Temperature Gauge.....	4-7
Oil Tank.....	4-8
Cooling.....	4-8
Cowl Flaps	4-9
Cylinder Head Temperature Gauge	4-10
Comparison between Liquid and Air-Cooling Systems	4-10

CHAPTER 5

Ignition System

Introduction	5-1
Magneto Operation	5-1
Primary Circuit	5-2
Secondary Circuit.....	5-2
Auxiliary Systems for Starting	5-3
Impulse Coupling	5-3
Induction Vibrator System (LT Coil)	5-4
HT Booster Coil.....	5-4
Pre Take-Off Checks	5-5
Magneto Checks	5-5
Dead Cut Check.....	5-5
Single Ignition Check	5-5

CHAPTER 6

Engine Operation

Propeller Inspection	6-1
Basic Starting Procedure	6-1
Power Changes	6-2
Power Settings.....	6-2
Gauges	6-3
RPM Indication.....	6-3
Mechanical Tachometer.....	6-3
Electric Tachometer	6-4
Manifold Absolute Pressure Gauge (MAP)	6-4
Fuel Flow and Pressure Gauges.....	6-5
Oil and Temperature Indications	6-5

CHAPTER 7

Piston Engine Performance

Introduction	7-1
Normally Aspirated.....	7-1
The Effects of Altitude on Performance	7-1
Additional Factors that Affect Engine Performance.....	7-4
Ram Air Pressure.....	7-4
Humidity	7-4
Carburettor Air Temperature	7-4
Cruise Control	7-4

CHAPTER 8

Piston Engine Fuel Injection

Fuel Injection System.....	8-1
Injection Pump	8-2
Electric Pump.....	8-3
Fuel/Air Control Unit.....	8-3
Fuel Manifold Valve	8-4
Injector Nozzles	8-5
Fuel Pressure Gauge	8-6
System Advantages	8-6
Alternate Air Control.....	8-6

CHAPTER 9**Piston Engine Power Augmentation Systems**

Introduction	9-1
Compressor	9-2
Supercharger	9-3
Supercharger and Turbocharger Performance	9-3
Turbocharger.....	9-5
Waste Gate	9-7
Fixed Waste Gate	9-7
Overboost Protection	9-7
Manually-Operated Waste Gate.....	9-8
Waste Gate Actuator.....	9-8
Absolute Pressure Controller	9-9
Variable Pressure Controller	9-10
Dual Unit Controllers.....	9-11
Triple Unit Controllers	9-12
Intercooler	9-13
Turbo Lag.....	9-13

CHAPTER 10**Propellers**

Introduction	10-1
Propeller Efficiency	10-1
Fixed Pitch Propellers	10-2
Fixed Pitch Propeller Disadvantages	10-2
Blade Twist	10-4
The Variable And Constant Speed Propeller	10-4
Constant Speed Propeller Blade Positions	10-5
Single-Acting Propeller.....	10-6
Low Pitch Stop or Centrifugal Latch	10-7
Constant Speed Unit (CSU)	10-8
Single-Acting Propeller Feathering.....	10-12
Single-Acting Propeller Un-Feathering	10-12
Propeller Control Unit (PCU).....	10-14
Double-Acting Propeller	10-15
Double-Acting Propeller Feathering	10-15
Double-Acting Propeller Un-Feathering	10-16
Pitch Stops	10-16
Beta Range	10-16
Reverse Pitch.....	10-17
Pitch Locks.....	10-17
Automatic Feathering	10-18
Synchronisation System.....	10-19
Synchrophasing System	10-20
Synchrophasing System Operation	10-20
Propeller Checks.....	10-21
Reduction Gearing	10-21
Torquemeters.....	10-22

CHAPTER 11**Gas Turbine
Principles of Operation**

Introduction	11-1
Newton's Laws of Motion	11-1
Bernoulli's Theorem	11-2
Convergent Duct	11-3
Divergent Duct	11-3
The Working Cycle of a Gas Turbine Engine	11-4
Thrust	11-5
Power	11-6
Equivalent Horsepower	11-6
Efficiencies	11-6
Specific Fuel Consumption	11-6
Thermal Efficiency	11-6
Propulsive Efficiency	11-7

CHAPTER 12**Gas Turbine Engines
Types of Construction**

Turbojet	12-1
High By-Pass Turbo Fan	12-2
Turboprop	12-4
Turboshaft	12-6

CHAPTER 13**Gas Turbine Engines
Air Inlet**

Introduction	13-1
Subsonic Air Inlet	13-2
Supersonic Air Inlet	13-2
Operational Problems	13-6

CHAPTER 14**Gas Turbine Engine Compressor**

Introduction	14-1
Centrifugal Compressor	14-3
Axial Flow Compressor	14-6
Types of Axial Flow Compressor	14-10
Twin-Spool Axial Flow Compressor	14-11
Turbofan (High By-Pass) Twin/Triple Spool	14-12
Compressor RPM Indication	14-13
Diffuser	14-13
Compressor Stall and Surge	14-14
Over-Fuelling Surge	14-15
Surge Control	14-16
Bleed Valves	14-16
Variable Inlet Guide Vanes	14-17
Surge Envelope	14-18
Causes and Indications of Stall	14-18

CHAPTER 15**Gas Turbine Engine
Combustion Systems**

Introduction	15-1
Combustion Process	15-1
Type of System	15-4
Multiple Chamber	15-4
Tubo-Annular or Cannular	15-5
Annular	15-6
Fuel Nozzles	15-7
Vaporiser Type	15-7
Atomising Type	15-8
Simplex	15-9
Duple and Duplex	15-9
Spill-Type	15-11
Rotary Atomiser	15-11
Spray Nozzle	15-11

CHAPTER 16**Gas Turbine Engine
Turbine**

Introduction	16-1
Turbine Principles of Operation	16-3
Reaction Turbine	16-4
Impulse Turbine	16-4
Impulse/Reaction Blades	16-5
Turbine Cooling	16-7
Exhaust Gas Temperature	16-9
Materials and Stresses	16-10
Shrouds	16-11

CHAPTER 17**Gas Turbine Engine
Jet Pipe**

Exhaust System	17-1
Variable Area Nozzles	17-2
Convergent/Divergent Nozzles	17-3
Other Designs	17-4
Exhaust Noise Suppression	17-5

CHAPTER 18**Gas Turbine Engine
Reverse Thrust**

Introduction	18-1
Operational Problems	18-2
Reverse Thrust Systems	18-2
Clamshell Doors	18-3
External/Bucket Target Doors	18-3
Blocker Doors	18-4
Operation and Indication	18-7

CHAPTER 19**Gas Turbine Engine
Internal Air System**

Introduction	19-1
Cooling.....	19-1
Turbine Cooling.....	19-2
Sealing.....	19-3
Bearing Sealing.....	19-3
Accessory Cooling	19-5
Engine Overheat (Turbine Overheat).....	19-5

CHAPTER 20**Gas Turbine Engine
Gearboxes and Lubrication Systems**

Auxiliary Gearbox.....	20-1
Gearbox Arrangement	20-2
Lubricating Oils	20-3
Types of Systems	20-3
Oil System Components	20-6
Oil Tank.....	20-6
Filters	20-7
Oil Pumps	20-8
Relief and Bypass Valves	20-9
Oil Coolers	20-9
Centrifugal Breather.....	20-10
Bearings.....	20-11
Magnetic Chip Detectors.....	20-11
Indicator Chip Detector	20-12
Instrumentation	20-12

CHAPTER 21**Gas Turbine Engine
Fuel Systems**

Fuels	21-1
Typical Fuel Systems.....	21-1
Low-Pressure Fuel System.....	21-3
LP Cock	21-3
Low Pressure Pump.....	21-3
Fuel Heater	21-3
Fuel Filter	21-4
High-Pressure Fuel System	21-5
High Pressure Pump.....	21-5
Fuel Control Unit (FCU)	21-7
High-Pressure Shut Off Valve.....	21-8
Fuel Flowmeter	21-8
Pressurisation and Dump Valve.....	21-8
Fuel Injector Nozzles	21-8
Fuel Control Systems.....	21-9
Controls and Indications	21-11

CHAPTER 22**Gas Turbine Engine
Starting and Ignition Systems**

Introduction	22-1
To Start A Turbine Engine	22-1
Air Starter	22-3
Electric Starter	22-4
Starting Controls	22-4
Typical Twin-Spool Turbofan Starting Cycle	22-5
Single Spool Start Cycle	22-6
Ignition	22-7
Igniter Plugs	22-8
Ignition Modes of Operation	22-9
Ground Start	22-9
In-Flight Start	22-10
Continuous Ignition	22-10
Automatic Ignition	22-11
Engine Start Malfunctions	22-11
Wet Start	22-11
Hot Start	22-11
Hung Start	22-12

CHAPTER 23**Gas Turbine Engine
Electronic Engine Control**

Introduction	23-1
Full Authority Digital Engine Control (FADEC)	23-1
Engine Control Limiters	23-3

CHAPTER 24**Gas Turbine Engine
Performance**

Static Thrust	24-1
Engine Thrust In-Flight	24-1
Thrust and Shaft Horsepower	24-2
Variations of Thrust with Speed, Temperature, and Altitude	24-2
Speed	24-3
Temperature	24-3
Altitude	24-4
Engine Pressure Ratio (EPR)	24-5
Engine Thrust Rating	24-5
Flat Rated Power	24-6
Bleed Air	24-7
Internal Supplies	24-7
External Supplies	24-7
Effects of Bleed Air Extraction	24-8
Thrust Augmentation	24-8
Afterburning	24-8
Afterburning System	24-9
Water Injection	24-10
System Operation	24-11

CHAPTER 25**Powerplant Operation and Monitoring**

Introduction	25-1
Take-Off	25-1
Climb	25-1
Cruise	25-2
Descent	25-2
Approach and Landing	25-2
Engine Idle RPM	25-2
Control of Thrust/Power	25-2
Engine Monitoring	25-3
Engine Speed (RPM)	25-3
Engine Pressure Ratio Indicator	25-4
Turbine Gas Temperature	25-5
Oil Temperature and Pressure	25-6
Fuel Temperature and Pressure	25-6
Vibration	25-6
Engine Torque	25-7
Electronic Indicating Systems	25-7
EICAS	25-8
ECAM	25-9
Warning Systems	25-9

CHAPTER 26**Auxiliary Power Unit (APU)
and Ram Air Turbine (RAT)**

Auxiliary Power Unit (APU)	26-1
General Description	26-2
Location	26-3
Air Supply	26-4
Fuel Supply	26-4
Lubrication	26-4
Starting and Ignition	26-4
Cooling	26-4
Anti-Icing	26-4
Fire Detection and Extinguishing	26-4
Controls and Indicators	26-5
APU Shut Down	26-5
Ram Air Turbine (RAT)	26-6
