**FreeFlight (Trimble) NavData Services to be Discontinued
After Cycle 0813 for the Following GPS Systems.**

February 1, 2008

- TNL 2000/2100/3000/3100
- TNL 2000T/2100T/3000T/3100T
- TNL 1000 DC
- TNL Approach 2000, 2100, 2101 I/O

We regret to inform you Jeppesen will discontinue offering NavData services for the FreeFlight (Trimble) GPS systems listed above as of Cycle 0813 (Effective Date: December 18, 2008).

This has been a difficult decision to make and has been necessitated by the fact that Jeppesen and FreeFlight have exhausted all alternatives to produce these databases so that they can fit on the required edge cards for these GPS systems. These units are engineered to only accept 1MB cards and the Jeppesen databases have exceeded these limits due to normal growth of aviation data. Furthermore, edge cards have become nearly obsolete and Jeppesen no longer has the parts necessary to build Skybound adapters for edge cards.

We understand it's not easy to quickly replace GPS systems in your aircraft; so this is why we plan to continue offering these services through the end of the year. Please note, in order to continue these services, airports may need to be removed from the database so that the database fits on the edge card.

If your revision service extends beyond Cycle 0813, we will refund you the difference from January 15, 2009 to your established end of service date.

Sincerely,

Jeppesen
