Jeppesen NavData CHANGE NOTICES highlight only **significant** changes affecting Jeppesen navigation data that may be currently stored in your aircraft navigation system database.
IMPORTANT: CHECK FOR NOTAMS AND OTHER PERTINENT INFORMATION PRIOR TO FLIGHT.

**FOR NavData BASE
 19 Nov 09 THRU 16 Dec 09 CYCLE 0912**

GENERAL

"Procedure Not in Database" notes will be removed from charts as these procedures are added to the database. This effort will start with US RNAV Multiple Approach Indicator Procedures. A Multiple Approach Indicator Procedure is one which has a special designator such as a Y or Z in the approach title; for example, RNAV (GPS) Z Rwy 22. Not all avionics equipment is able to accept these added procedures. If a special designator is shown on a chart but does not appear in your avionics display, it is critical that you confirm which procedure is in your database by manually paging through each leg of the procedure in your equipment and comparing it to charted procedure.

NAVAID

BOGALUSA USA NDB Bogalusa (GVB) changed to Carma (BX).
