NavData

Cycle 0810

**Skybound (for GNS480, MX20 & G1000),
Skybound II & Skybound USB
Software Support to End**

August 27, 2008

If you use JSUM (Jeppesen Services Update Manager) as your internet delivery application for NavData and Chart services, please disregard this notice.

Beginning Cycle 0810 [Effective September 25, 2008] Jeppesen will be unable to continue support for **Skybound (for GNS480, MX20, & G1000), Skybound II and Skybound USB** software applications.

Jeppesen will be releasing a new Jeppesen.com shortly. Due to complications getting Skybound (for GNS480, MX20, & G1000), Skybound II and Skybound USB software applications to communicate with the new website; we are put in the position to discontinue this support. As a result, NavData and Chart updates will no longer be available through these software applications.

All Skybound (for GNS480, MX20, & G1000), Skybound II and Skybound USB software application users will need to begin using **JSUM (Jeppesen Services Update Manager)** software application for internet updates beginning Cycle 0810. JSUM software can be downloaded from the following URL:

www.jeppesen.com/jsum/download

Contact Jeppesen • Captain@Jeppesen.com • US Toll Free: 1-800-621-5377
• US Direct: 303-799-9090 • UK Toll Free: 08000 UK JEPP or 08000 085 5377
• Germany, Austria, Switzerland and France Toll Free: 00800 JEPPESEN or
00800 53773736 • Other Eastern Hemisphere Customers: +49 6102 5070

JSUM installation will automatically remove Skybound (for GNS480, MX20, & G1000) and Skybound USB software from your PC. If you have Skybound II software installed on your PC, please uninstall this software prior to installing JSUM. You will use the same login/password in JSUM as you used in the other software applications.

Skybound (for GNS480, MX20, & G1000) software users:

You can continue to use the same universal reader/writer for your NavData and/or Chart service(s) when updating from JSUM.

Skybound II software users:

You will need to begin using the appropriate Skybound hardware you've received (Skybound USB or Skybound G2, depending on the GPS system(s) you use) for your NavData service(s) when updating from JSUM.

Skybound USB software users:

You can continue to use the same **Skybound USB** hardware for your NavData service(s) when updating from JSUM.

The discontinuation of Skybound (for GNS480, MX20, & G1000), Skybound II and Skybound USB software support does not impact your account, including your NavData and/or Chart subscription(s). The same NavData and/or Chart database(s) you've received through these software applications are also available through JSUM.

If you have questions, please contact our Customer Service team at captain@jeppesen.com or Technical Support team at pctechsupport@jeppesen.com.

Regards,

Jeppesen
